**Straining bag after Milks (US 1,053,850, 1913) - cutting and bending layout, NOT to scale. All sizes ours (mm).**

**1. BAG BODY: cotton cloth 660 x 330 (10 seam allowance all round)**

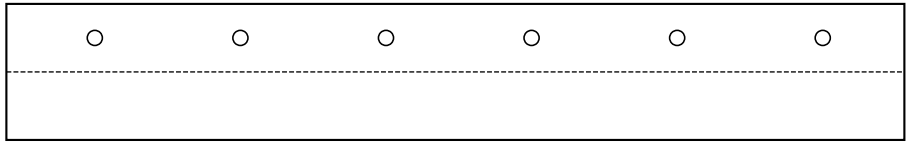

sew into a tube 640 round; top edge goes inside the band

**2. BAG BOTTOM: circle 224 across**

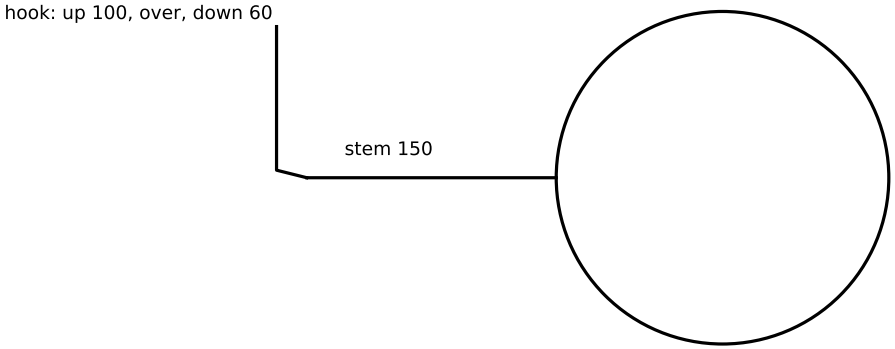

(204 finished; sewn to the tube)

**3. BAND: canvas (cotton duck) 660 x 100, folded on the dashed line to 50 wide double**

6 worked eyelets on 5 mm holes, 15 below the fold, 107 apart (first 55 from the end); ends overlap 20

**4. HOOP, STEM AND HOOK: one 3 mm stainless wire, about 1050**

Order: hook (60 down, over, 100 up), 90 deg bend, 150 stem,

then the hoop; wrap the end twice round the stem.

5. SIX HOOKS: 2 mm stainless wire, 60 each: wrap the top twice round the hoop,

turn the bottom 10 up as a hook for an eyelet (Milks: free ends turned upwards).

**6. BRACKET: 1 mm stainless strip 15 x 120: two screw holes,**

bent out 5 in the middle so the hook slips behind it.
